

Wholesale/vendor logistics management system

Service/solution

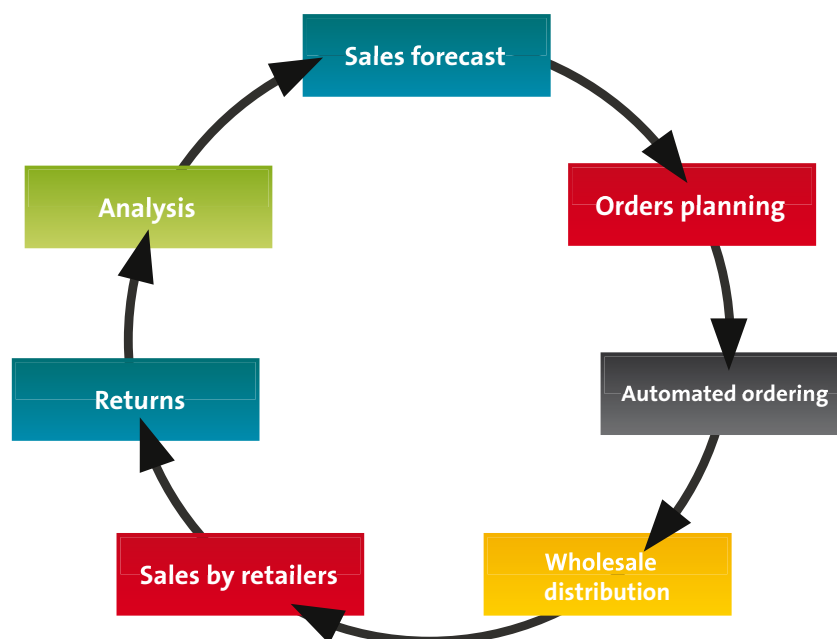

Vendor logistics management system introduces a whole new level of efficiency to wholesale companies by providing automated logistics management processes.

The finely tuned innovative processes enable significant gains in time, cost reduction and increase the transparency for both vendor and the retailer. Better managed and monitored processes ensure higher customer satisfaction.

The solution includes orders, logistics, sales forecast and VMI modules (with campaign functionalities integrated) and is integrated with existing systems to provide maximum automation and accuracy.

The implementation of the system requires business analysis to recognize the integration needs.

Helmes provides full support based on SLA.

Benefits

- Both the vendors and retailers achieve significant cost reduction by reduced manual work, better error avoidance, reduced storage space and minimized stock financing.
- Sales forecasts help optimize the stock levels for retailers and the vendor, and plan the most rational logistics to keep the stocks in accordance with the needs of a retailer.
- The goods move just-in-time and every step of the distribution process can be closely monitored. Thus the delays can be handled to minimize the lost sales. The lost sales can be reported and the order policy can be fixed based upon this information.

History, Facts and Future Development

The system is developed in close cooperation with wholesale, logistics and vendor management specialists and has been in use and subject to continuous improvements for over 8 years now. The system remains to be further improved and updated as it aims to reflect the most innovative business processes in the industry.

Technologies

Microsoft .Net C# 3.5, SQL Server 2008, integration readiness with different ERP solutions (eg. Agresso, Oracle EBS, Scala, MS Dynamics, SAP etc.)

Partners and software development experience

Helmes is of the leading software developers in Estonia with extensive experience in telecom, finance, logistics and e-health sectors. Helmes has developed e-purchasing and delivery management IS, automated customer survey handling solution, online travel system for bookinghouse.net and many other sales and logistics enhancing systems.
